

It was a great experience to be part of the “**One World, One Profession, One Destination**”, 2013 IIA International Conference, Orlando. The conference program was truly beneficial and the knowledge shared were related to the latest internal audit practices. The speakers from all parts of the internal audit diaspora were experienced and provided current insights on the profession.

The president of IIA Malaysia, Ranjit Singh, being the internal audit expert from Asia, was also a speaker at this conference. He shared with the internal auditors on his area of expertise titled *Developing and Implementing Fraud Risk Assurance Map*. I was also excited with the networking opportunities, to mingle with over 2,000 internal auditors from 110 countries who attended the conference. The interaction with fellow internal auditors and sharing of knowledge and experiences were priceless.
